To Whom It May Concern,

This letter serves as my cover letter in applying for the position of “Associate Research Analyst – Data Focus”, as found on www.glassdoor.com.

I am currently going through a career change. After receiving my Masters Degree in Mathematics, I worked mostly in the educational field as a University Professor and College Instructor. Teaching is not much of an intellectual challenge once you get the lesson plans worked out. I have been working toward a career shift for the last few years, and am mostly interested in anything related to cybersecurity, data science, and/or blockchain technologies. The COVID-19 situation radically changed the working environment, and all of the reasons that I enjoyed being a full-time College Mathematics Instructor started to disappear. I took that as a sign that I needed to get serious about the career change. I decided to sign up for the Data Science Professional Certification program through HarvardX, paying completely out of pocket. I was about 2/3 of the way thorough the program when a hostile working environment inspired me to resign from teaching and focus on my coursework full time. I completed the certification in November of 2021, and fell in love with the field in the process. This is just the intellectual challenge I have been looking for! Now I just need to find the right employer to work with. When I came across the listing for “Associate Research Analyst – Data Focus”, I applied immediately because I seem to be qualified and is exactly the sort of opportunity I am seeking.

I look forward to arranging an interview if possible. I live in Northern New Mexico, so a remote interview of some kind would be preferred. Thank you for taking the time to look over my credentials and consider my candidacy.

Sincerely yours,

Kaylee Robert Tejada
