February 21, 2022

GreenTech Energy LLC  
Las Vegas, NM

To Whom It May Concern,

This letter serves as my cover letter in applying for the “Solar Sales Trainee”, as found on [www.indeed.com](http://www.indeed.com).

I am a very hard working, organized, detail oriented and creative problem solver. After receiving my Masters Degree in Mathematics, I worked mostly in the educational field as a University Professor and College Instructor. I have been excited about the solar energy industry in New Mexico for many years and even worked as a panel installer one summer for Positive Energy. I have been working toward a career shift for the last few years in response to fundamental changes that all academic institutions are undergoing. I retired from teaching last year but have kept my private tutoring clients. I have been looking for a position in an industry that I can grow with. I applied immediately because I believe that the solar energy industry will continue to thrive and make the world a better place, especially if it is staffed with committed professionals. I am a math/computer/data enthusiast with a strong desire to participate in successful projects and see them to the end. I have a lot of varied experience from “summer jobs” that do not fit on my résumé, including home construction, café management and many other things under independent contract.

I look forward to arranging an interview. I reside in both Albuquerque and Northern New Mexico while I build my dream off-grid home near Las Vegas. There is no time like the present to do what you have always wanted. I am available to start immediately. Thank you for taking the time to look over my credentials and consider my candidacy.

Cordially,

Kaylee Robert Tejada
